Pranav Venkitesan

Senior Frontend Engineer React · TypeScript · Design Systems · Performance · AI Product

Bengaluru, India / +91 9743156449 / pranavvenkitesan@gmail.com / linkedin.com/in/pranav-venkidesan / website link

SUMMARY

Senior Frontend Engineer with 8+ years of experience building scalable React and TypeScript applications for enterprise SaaS products across Europe and India. Expertise spans design systems, performance engineering, accessibility, and AI-powered user experiences built with OpenAI APIs. Proven track record of improving Core Web Vitals by 80%, reducing manual workflows by 60%, and leading frontend standards, mentoring engineers, and driving technical excellence across multiple product teams. Open-source maintainer of Ember Elements, a TypeScript UI toolkit with 100+ GitHub stars.

TECHNICAL SKILLS

Languages	TypeScript, JavaScript (ES6+), HTML5, CSS3
Frontend	React.js, React Hooks, custom hooks, Next.js, Ember.js, single-page applications (SPA), component architecture, reusable components, responsive & data-dense UI
Design Systems	Component libraries, design tokens, API design for components, versioning & documentation
State Management	Redux, Zustand, MobX, React Context, Ember Data
Styling	Tailwind CSS, SCSS, CSS-in-JS, responsive layout
AI & LLM	OpenAI GPT APIs, prompt design, LLM-backed product features
Backend & APIs	Node.js, RESTful APIs, Firebase (Authentication, RBAC, real-time data)
Testing & Quality	Jest, Cypress, QUnit, test-driven development (TDD), cross-browser testing, code review standards
Performance	Core Web Vitals, performance profiling, Lighthouse, code splitting, lazy loading, bundle optimisation
Accessibility	WCAG 2.1 AA, keyboard and screen-reader support, accessibility audits
Tooling & CI/CD	Git, Webpack, Vite, npm, ESLint, Prettier, CI/CD pipelines, Figma
Ways of Working	Technical leadership, frontend architecture, engineering standards, developer experience, mentoring, cross-team collaboration, Agile

EXPERIENCE

Zenloop GmbH · Berlin, Germany — Jul 2022 – Mar 2026

Senior Frontend Engineer

Customer-experience analytics platform for Fortune 500 clients · React, TypeScript · three delivery squads.

- Led frontend architecture, feature delivery and code review across **three squads**, refactoring core React and TypeScript modules and partnering with product, design and backend engineers to ship customer-facing analytics features.
- Shipped an AI topic- and keyword-analysis system on OpenAI GPT APIs that cut manual analysis time by **60%**, enabling customer success teams to cover **3× more accounts** per month.
- Improved UI performance **80%** through route-level code splitting, lazy loading and bundle optimisation, moving Core Web Vitals into top-quartile scores for the platform.
- Built and maintained a **15+ module React component library** consumed by three squads, cutting average feature development time by **40%**.

- Drove cross-team integration defects down **30%** by establishing the shared code review standard and running regular pair-programming sessions.

Mitsogo (Hexnode UEM) · India — Jun 2019 – Jun 2022

Senior Software Engineer, Front End (Sep 2021 – Jun 2022)

- Architected a **20+ component UI toolkit** adopted across **3 enterprise product lines**, standardizing UI patterns between design and engineering and accelerating feature delivery on every product.
- **Halved onboarding time** for new front-end developers by authoring the team's coding standards and component documentation during rapid headcount growth.
- Mentored **5 junior engineers** on component architecture, testing and accessibility; **3 promoted** within a year.

Software Engineer, Front End (Jun 2019 – Sep 2021)

- Cut deployment time from **2 hours to 20 minutes** by introducing TDD and automated CI/CD pipelines with Jest and Cypress.
- Delivered **WCAG 2.1-compliant**, cross-browser responsive dashboards that qualified the product for accessibility-regulated markets.
- Reduced post-launch bug reports **45%** by running stakeholder UI/UX validation sessions ahead of build.

Mediapp · India — Sep 2017 – Aug 2018

Junior Front-End Developer

- Delivered the admin panel for India's first B2B pharmaceutical platform, serving **10,000+ users across 500+ pharmacies** on launch day.
- Engineered Firebase-backed authentication with **role-based access control (RBAC)**, keeping multi-tenant pharmacy data isolated.
- Cut order processing time **35%** with real-time data grids and a task scheduler in Ember.js.

OPEN SOURCE

Ember Elements · Creator & Maintainer — 2021 – 2023

- Architected an open-source **TypeScript component library for Ember.js**, built on Blueprint and engineered for data-dense enterprise interfaces - accessible, reusable components with typed public APIs.
- Designed the component API surface and TypeScript types, authored the usage documentation, and ran the versioned npm release process end to end.
- Grew the project to **100+ GitHub stars** with adoption by several enterprise teams, supporting users through issue triage and community requests. github.com/ember-elements/ember-elements

EDUCATION

M.C.A., Computer Application · Amrita Vishwa Vidyapeetham, India — 2015 – 2017

B.C.A., Computer Application · Amrita Vishwa Vidyapeetham, India — 2012 – 2015

ACHIEVEMENTS

- Top **30% nationally** in the All India ICPC Spot Coding Competition among 5,000+ participants.
- Advanced to elimination rounds of **CodeChef SnackDown**.

PUBLICATIONS

- “3D Structural Prediction with Docking for Five Stages of Lymphoma” — IEEE International Conference.
- “Comparative Sequence Analysis and 3D Structure Prediction Using Pairwise and Needleman-Wunsch” — IEEE International Conference.
- “Novel Approach Using LCMSQ Algorithm for Identifying Lymphoma Stages” — International Journal of Pharma and Bio Sciences (IJPBS).
